

Fine Dentistry of Downtown Orlando

Aileen Trivedi, DMD, FAGD

OUR VISION: Our purpose and passion at Fine Dentistry of Downtown Orlando is to give every patient the highest quality dental care in a safe and non-judgmental environment. We will strive to make each patient's appointment a caring and pain-free experience by listening to their dental goals and engaging with them to achieve it through education on oral health and using the most advanced technology that dentistry can offer. We want all our patients to feel at home and to trust that they will always have first class and family friendly experience. **SPECIALTY:** A comprehensive approach to dental care. We cater to patients who want the best and most convenient dental options. We do same-day crowns, digital dentistry, and are equipped to make yours a 5-star experience. We perform every traditional dental procedure, and have the latest technology and the newest cosmetic approaches as well. Our office brings in specialists to make complete care through collaboration our standard. We LISTEN to what the patient's concern is, and then come up with an action plan. We offer SAME-DAY CROWNS, Veneers, no-metal restorations, crowns, root canals, Invisalign®, implants, dentures, partial dentures, fixed bridges, and complex corrective dentistry, treatment for TMJ disorder, and botox and filler. **EDUCATION/CERTIFICATIONS:** Bachelor of Science in Microbiology/Immunology from University of Miami; Dental School at Boston University Goldman School of Dental Medicine; General Practice Residency with an emphasis on medically compromised patients and oral cancer survivors. **AWARDS/HONORS:** The prestigious Fellowship of the Academy of General Dentistry, and being voted Top Dentist so many years in a row. **GREATEST RECENT ACCOMPLISHMENT:** Renovating our historic building and creating a space that is state of the art, and facilitating the use of the latest technology and equipment. **GREATEST RECENT PROFESSIONAL ACHIEVEMENT:** I love what I do, and I am

grateful for the chance to help patients with my skills. Recently I was featured as a dental expert on Fox 35 News on the segment about Invisalign®. That was great fun to do, and a wonderful spotlight on our practice. You can check it out on my website: FineDentistry-Orlando.com. **INNOVATIONS:** We use every technological advance to make dental experiences painless and comfortable, even for the most anxious patients. Fine Dentistry is one of a very few dental practices that uses a digital scanner instead of mold impressions for SAME DAY implants, crowns, bridges, veneers, case planning, night guards, and Invisalign®. It is a privilege being one of the few dentists in Central Florida doing the life-changing procedure called Teeth Express®! Working with a board-certified periodontist, we are able to give patients back their smile. **WHAT SETS US APART:** A passion to be the best, and treat our patients with the service and technology that we would want for ourselves. We put a lot of effort into planning our cases with photography and using Wax Models of how we want our cosmetic outcome, prior to even doing any work on the patient. It helps us achieve the top results that have earned us our reputation. Our team genuinely cares that every part of your dental experience is exceptional. Our goal is to be the best of what dentistry has to offer, and from the feedback we receive on a daily basis, we are meeting our goal! **MY THANKS:** Thank you, Orlando, for making us the best, once again. We continue to stay on the cutting edge of dentistry and win awards, and that is all thanks to you!
