Dr. Wardlaw is also involved in community-based outreach in emergency/field dentistry in Central Florida. **FROM DR. WENDI'S DESK:** "An infection in your mouth is an infection in your head. There are only two routes an infection in your mouth can go; up (your brain) or down (your heart). Research has shown that both heart disease and strokes are associated with oral disease along with low birth weight babies and diabetes. You can't be healthy without a healthy head; therefore make it a point to have a routine dental checkup. Be blessed and be healthy."
