Dennis R. Horanic, DMD

Lake Forest Family Dentistry

SPECIALTY: General Dentistry practice dedicated to family care with an emphasis on cosmetic dentistry. **EDUCATION:** A Lake Mary High School graduate, Dr. Horanic received his Bachelor's Degree in Analytical Chemistry at the University of Central Florida, and his Doctorate of Dental Medicine at the University of Florida. **AWARDS/HONORS:** *Orlando* magazine Top Dentists 2008, 2010, 2011, 2012 and 2013. **PROFESSIONAL MEMBERSHIPS:** American Dental Association, Florida Dental Association, Central Florida Dental Association, American Academy of Cosmetic Dentistry, CEREC-Trained Dentist, Invisalign Certified Dentist, CAMBRA Certified Dentist, Academy of Laser Dentistry, Team Dentist for UCF, 1993-1999. **GREATEST PERSONAL ACHIEVEMENT:** My beautiful family. My wife, Kristina, and my 6-year-old daughter, Kaitlyn, are inspirations to me. After years of my wife battling uterine and ovarian cancer, we were finally able to have our precious daughter... who always keeps us on our toes! **GREATEST PROFESSIONAL ACHIEVEMENT:** Combining the latest cutting-edge techniques with "good old-fashioned" dentistry. I enjoy showing and explaining to patients how they can improve their smiles with modern dentistry and how easy it is to have a pain-free visit to the dentist. **INNOVATIONS:**

We utilize CEREC for creation of single-day crowns through CAD/CAM technology, and routinely use laser technologies. We are a completely digital and chartless practice, emphasizing the latest in technology. **WHAT SETS HIM APART:** I establish a "one-on-one relationship" with patients. I enjoy educating patients on how to improve their dental health. I not only want to make patients aware of their current dental needs, but want to help them understand how they can prevent future dental issues. **OFF HOURS:** Traveling, Orlando Magic basketball, Florida Gator games, and spending time with my family. **FREE ADVICE:** Keep an eye on the citric acid in your diet. If it tastes like lemon/lime or orange, it will probably be harmful to your enamel and increase chances of decay. Studies have shown similar decay rates between diet and non-diet sodas. If you want to have soda, root beer is the least harmful to your teeth.
