## Rebecca Pitts, DMD, DSc, FAACD

**SPECIALTY:** Cosmetic and General Dentistry. **EDUCATION:** DMD and Doctorate in Advanced Restorative Dentistry from Boston University. **AWARDS/HONORS:** Achieving the “Accredited Fellow” status, the highest designation from the American Academy of Cosmetic Dentistry. To receive this honor, cosmetic dentists must demonstrate the greatest level of clinical excellence and skills through a large number of their actual clinical cases. They must also exhibit profound knowledge through stringent written and oral examinations. In 30 years, since the founding of the organization, and out of thousands of candidates, only 55 dentists worldwide have achieved this prestigious distinction. Furthermore, Dr Pitts is one of only two dentists who are also AACD-Accredited ceramists. **GREATEST PROFESSIONAL ACHIEVEMENT:** Innovations in conservative esthetic dentistry and receiving the Doctor of Science (DSc) degree—the equivalent of the PhD, in the areas of fixed-prostodontics, advanced restorative, high-tech and cosmetic dentistry. After earning a DMD degree, a dentist must complete an additional five-year full-time graduate program to be considered for this distinction. **INNOVATIONS:** 1. The ultra-conservative additive CAD/CAM veneers that

yield the highest level of esthetic and function. 2. The latest teeth whitening system to help those with severe or resistant discolorations such as Tetracycline-stained or mottled teeth. Her proprietary ORLAD Whitening System is also significantly more effective in whitening regular and aged teeth than any other previous systems. 3. Invention of a special bonding technique to close the triangular spaces between the teeth along the gum line. **WHAT SETS HER APART:** Dr. Pitts is the dentists’ dentist—many colleagues see her for their own dentistry. **CHAIRSIDE MANNER:** “Every patient is very special to us. They are our friends and family. Our caring and professional dental team strives to provide the best care for our patients, while making their entire experience as pleasant and comfortable as possible.”
