COMMUNITY-BASED CANCER CARE IN CENTRAL FLORIDA: At Florida Cancer Specialists & Research Institute, our primary purpose – and our passion – is to provide the most advanced cancer treatment, using cutting-edge technologies, in a setting where patients can be close to home and surrounded by family and friends. With eight locations in the greater Orlando region, Florida Cancer Specialists and its physicians are affiliated with leading area hospitals, as well as the Moffitt Cancer Center. **CANCER RESEARCH:** Florida Cancer Specialists is a proud recipient of the American Society of Clinical Oncology (ASCO) 2011 Clinical Trials Participation Award, which is presented nationally to recognize practices that have established high-quality clinical cancer research programs. In association with Sarah Cannon Research Institute, one of the nation's largest clinical research programs, FCS offers patients access to more national clinical trials than any private oncology practice in Florida. **WHY CHOOSE FLORIDA CANCER SPECIALISTS:** Established in 1984, Florida Cancer Specialists & Research Institute is the largest privately-owned oncology/hematology practice in the United States. With over 100 physicians, 60 nurse practitioners and nearly 50 clinical sites in our network, we are committed to providing world-class cancer care in community-based settings close to home. FCS serves patients along the Gulf Coast from Naples to Tampa, as far north as Gainesville, and as far east as Orlando in Central Florida. Our physicians have trained in such prestigious medical schools and research institutes as Duke, Stanford, Harvard, Emory, Yale, MD Anderson, and Memorial Sloan-Kettering; they provide leadership and consultation in the state's leading hospitals. To learn more about our practice, or to find a location near you, please visit our website: FLCancer.com
