## Neurological Services of Orlando, P.A.

### Mark Klafter, D.O., Daniel Jacobs, M.D.

**OUR PRACTICE:** In addition to forming downtown's largest neurology group since 1999, Drs. Mark Klafter and Daniel Jacobs, founders of Neurological Services of Orlando (NSO), continue to grow their reputation of quality neurology care – one patient at a time. They provide an atmosphere in which patients can have all of their neurological needs met under one roof. Drs. Klafter, Jacobs and their associates all are board certified and fellowship trained subspecialists, allowing for integrated and high-level care. Says Dr. Klafter, "It is a privilege to be able to provide all of those services in one place: diagnosis and treatment of nerve/muscle disorders, stroke, memory disorders, headache, epilepsy and sleep disorders – and, most importantly, by physicians who give each patient as much time and effort as necessary to reach a proper diagnosis and treatment." **DR. DANIEL JACOBS:** Clinical Adjunct Associate Professor of Neurology at University of Florida's College of Medicine, Vice Chair of Neurology at Orlando Health and Director of both the hospital's stroke services and NSO's Multiple Sclerosis Care Center (enhanced by Constance Easterling, ARNP, nationally awarded for excellence in MS care). While he is a practitioner in a wide array of neurological disorders, Dr. Jacobs specializes in cognitive aspects of stroke, multiple sclerosis and

dementia. **DR. MARK KLAFTER:** Has received numerous teaching and patient care honors and is a perennial top doctor selection. After his Albert Einstein College of Medicine fellowship in electromyography (EMG/NCS) and nerve/muscle disorders, he evolved into a national leader in botulinum (Botox) injections for limb/ neck/ facial spasms. As former President of the Florida Society of Neurology, he continues to advocate for patients with Parkinson's disease, peripheral nerve disorders and other conditions. **OUR ASSOCIATES:** In recent years, Drs. Klafter and Jacobs have been joined by Dr. Ahmed Sadek, founder and director of Orlando Epilepsy Center (outpatient epilepsy monitoring), and Dr. Navin Verma, Medical Director for Total Sleep Services/ Orlando. EMG/NCS, EEG and MRI are already available on-site, with plans to expand in 2012 – all in the interest of serving the Central Florida community.
