

## Ahmed Sadek, M.D.

### Orlando Epilepsy Center

**OUR PRACTICE:** “Our goal is to provide the highest quality of care for our epilepsy patients” says Dr. Sadek. “We strive to achieve our goals of unparalleled epilepsy services to our patients not only through our clinical team but also by providing one of the most sophisticated centers for epilepsy monitoring.” **OUR PHILOSOPHY:** As specialist and thought leader in the field of epilepsy, Dr. Sadek believes that medical and surgical approaches for managing epilepsy should be tailored for each patient according to epilepsy type, functional needs and their goals. In addition to highly advanced epilepsy management approaches, Dr. Sadek and his team emphasize compassion and patient advocacy as a core philosophy for care. **EDUCATION:** Dr. Sadek is an Ivy League-trained neurologist with extensive training in epilepsy management. He had two years of training at one of the premier institutions and leading epilepsy centers in the country, the University of Pennsylvania in Philadelphia. He received his residency training at Baylor College of Medicine. In addition to his epilepsy fellowship, Dr. Sadek also completed a two-year neuroimaging research fellowship at the University of Pennsylvania and has written numerous publications and several book chapters. **PROFESSIONAL MEMBERSHIPS/AFFILIATIONS:** Dr. Sadek is member of the

American Epilepsy Society as well as the American Academy of Neurology. He is an Assistant Professor of Neurology at the University of Central Florida College of Medicine, and Clinical Assistant Professor of Neurology at the University of Florida-Shands in Gainesville. **CERTIFICATIONS:** Dr. Sadek is Board certified in the field of Neurology and Clinical Neurophysiology. **IN THE COMMUNITY:** Dr. Sadek is medical director of Orlando Epilepsy Center, as well as medical director of the clinical neurodiagnostic section at Orlando Health. **EPILEPSY SERVICES:** “We provide a comprehensive approach to managing refractory epilepsy patients,” he says. This includes options for long-term video EEG studies, ambulatory recordings, and different prolonged and routine EEG studies. His services include patient selection for epilepsy surgery and VNS management. Dr. Sadek treats different types of epilepsy in adult and pediatric populations.
