

Animal Hospital at Baldwin Park and Animal Hospital of Lake Mary

ABOUT US: Animal Hospital at Baldwin Park has been serving the community since 1995. Formerly known as Herndon Veterinary Center, the hospital opened its new facility in July 2006. Our sister veterinary hospital, Animal Hospital of Lake Mary, was established in November 2001. **OUR DOCTORS:** We have years of experience in traditional medical and surgical services, as well as alternative medical modalities: Albert Nuñez, DVM, CVA; Elizabeth Carson, DVM, CVA; Carla Marrero, DVM; Allison Williams, DVM; David Vilallonga, DVM, PhD. **INNOVATIONS:** Discovery of the use of molecular hyperthermia for rapid rehabilitation of neurologic tissue in paralyzed animals, allowing for pets to regain mobility in record time. Ongoing discoveries continue in the areas of rehabilitation, tissue reconstruction, diabetes, infectious diseases and others. The use of molecular hyperthermia, chemotherapy, advanced ozone therapy and immunotherapy (cancer vaccines) for the treatment of tumors has given many of our patients a new lease on life. We strive to offer our patients time with quality of life. We are one of the few animal hospitals in the Orlando area offering a plethora of minimally invasive laparoscopic procedures including the quick recovery spay. **WHAT SETS US APART:** We are one of the first full-service integrative hospitals to offer holistic/alternative medicine as well as traditional medical modalities. Because our

doctors aren't constrained by orthodox methods and believe anything is possible, they often achieve seemingly impossible results. We provide acupuncture, herbals, homeopathic and energetic therapies, orthopedic manipulation, synergistically with multiradiant laser therapy, molecular hyperthermia, ozone therapy and other advanced surgical and diagnostic technologies. All of this is made possible through the unwavering dedication and commitment of our rock star staff. Each team member will go the extra mile to honor the unique relationship you have with your pet and give you the time and attention you deserve.
