## Winter Park Veterinary Hospital

Robert E. Hess, Jr., DVM, Andrew Newman, DVM, Charli Jane Braun, DVM, Marianne Janosco, DVM

**OUR PRACTICE:** Winter Park Veterinary Hospital has been serving Central Florida for over 58 years. We care for a variety of pets, from dogs and cats to birds, rabbits, ferrets, guinea pigs, small mammals and most reptiles. **PET PHILOSOPHY:** We believe pets make life better and consider each of our clients and their pets as part of our family. Many times this can't be put into words so please visit our video library at [wpvet.com](http://wpvet.com) to see firsthand the dedication and love we have for all our pet family members. **OUR COMMITMENT:** We practice innovative medicine and are dedicated to being a leader in high-quality veterinary care. Winter Park Veterinary Hospital exemplified its commitment to innovation when we performed the world's first online veterinary surgery. Equally innovative was the opening of our 2,500-square-foot private dog training center. Our clients now have unparalleled access to trusted obedience training and socialization for the lifetime of their dog. Our beautiful boarding facilities (species specific, of course) together with our training center provide your pet with a life-long home away from home. **WHY YOU SHOULD CHOOSE US:** Dr Hess has infused innovative skills and ideals into all aspects of the medicine and services offered at Winter Park Veterinary

Hospital. Because of his leadership, mentoring and training, our doctors and staff are versatile, skilled and passionate about providing our clients with the best medical care available for their pet family. **CHARITABLE WORK:** We are proud of our daily work helping Florida's wildlife and for three decades have had a wonderful partnership with the Audubon Center for Birds of Prey, treating more than 14,000 of the center's birds. Check out our Facebook page for many great companion animal and wildlife success stories. **FREE ADVICE:** All dog owners: Visit our website, then go to Resources and Articles/Brochures to download a free breed-specific health profile for your canine companion. It's a great tool for both education and preventative medicine.
